UNITED TECHNOLOGIES CORP. RENAMES IFC AS UTC FUEL CELLS

HARTFORD, Conn., Dec. 5, 2001 – United Technologies Corp. (NYSE: UTX) announced today that it has changed the name of its International Fuel Cells unit to UTC Fuel Cells.

The change, effective today, is intended to more directly associate the unit with UTC as fuel cell technology grows increasingly important.

UTC Fuel Cells, based in South Windsor, Conn., is the world leader in fuel cell production and development for commercial, transportation, residential and space applications. It is the sole supplier of fuel cells for NASA and the only company producing a commercially available fuel cell, the PC25TM power plant. UTC Fuel Cells has delivered more than 235 PC25s to customers in 19 countries on five continents.

Based in Hartford, Conn., United Technologies Corp. provides a broad range of high-technology products and services to the building and aerospace industries through its Otis, Carrier, Pratt & Whitney, Hamilton Sundstrand, Sikorsky Aircraft and UTC Fuel Cells units. More information is available at www.utc.com
